

MAYBRICK BOOK LAUNCH AND CONFERENCE

A Liverpool murder trial shocked Victorian Britain. Florence Maybrick was found guilty of killing her husband, James Maybrick, by poisoning him with arsenic. Florence was to spend 15 years in prison but did she really murder James? In 1992, a diary was found in which James supposedly confessed to committing the Ripper murders, but was James really Jack the Ripper? Using new material, the authors of a new book have provided definitive answers to both of these intriguing crime mysteries.
